## PROGRAMMING LANGUAGES

### Javascript

full professional proficiency

### Python

full working proficiency

## PERSONAL PROJECTS

Portfolio intergrated blog ([sdanielkenan.herokuapp.com](http://sdanielkenan.herokuapp.com))

- I designed and built this web application by prototyping and utilising expressjs for backend. Ejs partials are in use and Ajax calls to display multiple pages from the server in the blog section. A javascript library is called animation on scroll is used for animating the content. This portfolio has multiple links to projects source-code and url.

### Chef-recipe Web application

- This web application having a login system using expressjs and packages such as passport and session to register and authenticate a client.

### Eco Web Application

- This Web application is a front-end project having parallax animations and cursor animation and is hosted by git pages. The site focuses on the Ecosystem and balance of the wild.

### Traffic Racing Game

- A web racing game whereby a player must avoid incoming traffic and the collision is detected using theorem of pythagoras the function return returns the distance between two objects.

### Construction Website

- I built this website to promote the construction company in swaziland for absolutely free using expressjs and o could completely designed the User interface.

### Music Player

- a graphical user interface built with python with the tkinter module. A user can pick multiple music files in the local file system. The Pygame module is responsible for controlling the sound of the current track being listened to.

## EDUCATION

### NSC

Lesiba Secondary School

APS 26

2014 - 2019

- Science course

## SKILLS

HTML5/CSS3

Responsive design

gulp

Git

jQuery

Angular

EJS

Rubix Cube

API

Nodejs

Expressjs

## ACHIEVEMENTS

Linkedin JavaScript Assessment badge

Linkedin CSS Assessment badge

## INTERPERSONAL SKILLS

Attention to detail, effective communicator, active Listener, strong sense of design and typography, sketching and prototyping, work Ethic.

## SOFTWARE

Visual Studio Code

Figma

pycharm

Blender

Gimp photo editor
